ENTRUST YOUR RISK TO OUR COMPETENCE AND MARKET KNOWLEDGE

Cargo Insurance

We are not only insuring the classic transport perils but are also assisting our customers in fulfilling international compliance regulations.

Cargo Liability Insurance

Our client base includes haulage operators as well as freight forwarders or warehouse keepers, but also specialist operators of the logistics industry such as heavy-lift or project transport operators including shipping agents and NVOCCs. We insure independent truckers as well as internationally operating companies with worldwide subsidiaries.

Special Risk

We provide insurance solutions for related classes of business such as the insurance for travel luggage, valuables or goods-in-transit, furthermore special risk covers for chilled goods, steel products, prize indemnity (e.g. "hole-in-one"), event cancellation, terrorism or exposed property risks (wood-processing industry etc.).

Marine Hull, Inland Craft, Builder's Risk and Yacht-Insurance

Our customers are shipping companies, shipyards as well as single vessel owners.

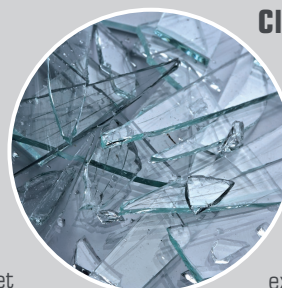

Furthermore we offer interesting insurance solutions for yachts and pleasure craft.

Fruit Insurance

For over 20 years we have been dealing with specific insurance requirements of fruit and service producers on world-wide level. In some regions of South America we are even market leaders! Besides the insurance concept, we also offer claim and recovery management as well as consultancy for loss prevention and market reports.

Claims Management

Irrespective of an existing insurance policy our expert knowledge may be used for recovery and claims handling services. We manage excess and aggregate deductible schemes, furthermore we settle claims on behalf of Insurers on national level as well as overseas. We are registered as debt collecting agency and employ a number of lawyers.

Motor Fleet Insurance

Our specialist team for motor insurance complements our range of products with insurance concepts for "heavy" truck fleets, especially haulage operators and freight forwarders, rental, distribution or bus vehicle fleets.

How we operate

As so called „Assekuradeur“ and underwriting agent we are entrusted with authorities of all major German and Austrian insurance carriers in the class of Marine Insurance.

Within the scope of our authority we do not only write insurance contracts but we also issue policies, arrange the premium collection and ensure the entire handling including claims management and payment – also in the case of major losses.

On the back of our various authorities granted to us by insurance carriers, we provide significant capacities and thus are able to insure even complicated and unusual risk exposures.

Insurance brokers appreciate that all issues are taken care by us as a “one stop shop” through direct contact persons from our team.

Our experience

Individual risk scenarios often require individual solutions. As one of the market leaders in Germany we cater for the necessary expertise and far-reaching market knowledge – since 150 years!

National and international law, liability regimes as well as individual contracts increasingly play a dominant role when it comes to arranging insurance covers. And we are fully familiar with these issues.

Together with our partners, loss adjusters and legal experts we handle claims and recoveries on world-wide level.

Not only does our staff encompass insurance experts, but also employees with logistics background, industrial engineers and lawyers.

We are member of the German associations for heavy lift transports and crane operations as well as cold storage operators. We have designed dedicated insurance products for the members of these associations.

Our services

We assist our clients in terms of fulfilling international compliance requirements. We issue international insurance programs (IP) and combine capacities where required in order to offer local solutions in as many countries as possible.

As Lloyd's coverholder we have access to the English insurance market and are thus a valuable partner for risks, which do not find a solution in the German market. Also for risks outside the class of Marine Insurance.

Challenge us with the search for insurance solutions in terms of specialty risks. Third Party Administration (TPA) is no foreign word to us.

Please contact us – we look forward to co-operating with you
